

## Bright Filer

### Features

- Integrates easily with existing equipment
- Single files aluminum or steel bright cans
- Speeds up to 2200 CPM
- Fast and easy changeover to different can sizes
- Automatically ejects downed cans
- Extremely fast ramp speed
- Equipped with a jam preventer
- Single files heavily etched and damaged cans

## Bright Filer

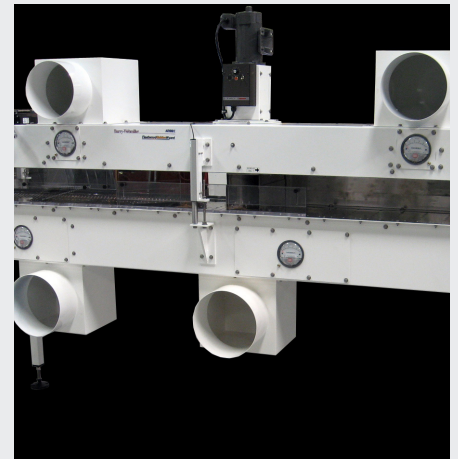

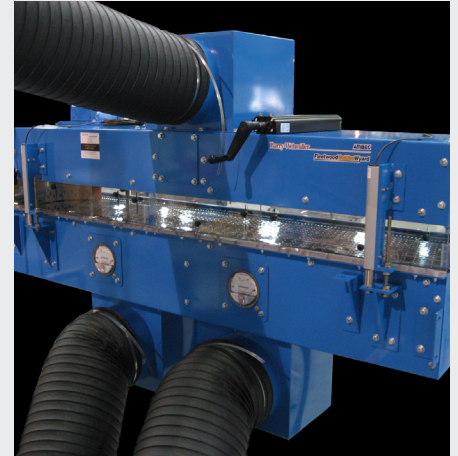

BW Container Systems' Bright Filer single filing system raises can manufacturing to a new level of productivity. The Bright Filer is a vertical can single filer that accepts bright cans in mass and moves them into a single file.

Through the use of BW Container Systems' air conveyor, the Bright Filer keeps cans in constant motion as it single files them at speeds up to 2200 cans per minute.

The Bright Filer is engineered to help eliminate losses and downtime resulting from can jams that occur so often in conventional equipment.

Every feature designed into the Bright Filer was done so to make your production line more productive and more profitable.

Contact our experienced sales teams today for a comprehensive review of your application(s) and to see how our Bright Filer can benefit your company.
