

Changeparts - Storage Solutions

BW Container Systems designs and manufactures storage solutions to suit any customer requirement. Solutions range from "A" frame to blow mould storage trolleys. All of our storage solutions are designed and built to specific customer requirements to meet any height or space restrictions.

BW Container Systems trolleys are manufactured using a coloured polycarbonate material allowing the outline of the particular part to be shown as well as the customer logo and engraving detail. These trolleys can be manufactured out of stainless steel, mild steel or powder coated.

Prior to manufacturing, all drawings are submitted to the customer for approval allowing the customer to share with their team the proposed solution and if required, suggest any amendments.

BW Container Systems also provides solutions for cleaning and maintenance equipment in the form of hygiene/wall boards. All of these items comply with 5S and Kaizen events.

Contact our experienced sales teams today for a comprehensive review of your application(s) and to see how our Changeparts Storage Solutions can benefit your company.
