

## Tight Pitch Live Transfer Conveyor

### Features

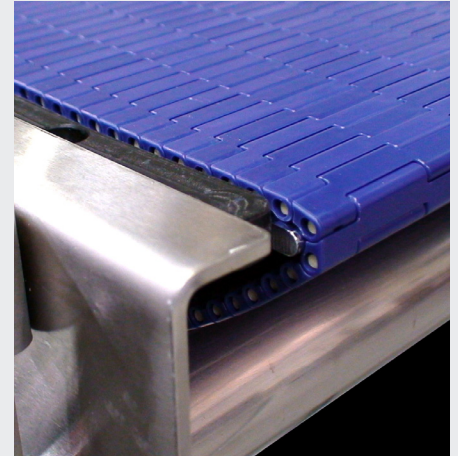

- Eliminates the need for a deadplate which causes product skewing
- Matches speed of transfer chains
- Tight pitch 0.3" chain wrapped around a 1/4" nosebar
- Transfer is auxiliary driven from existing chain - motor not required

# Tight Pitch Live Transfer Conveyor

BW Container Systems' Tight Pitch Live Transfer Conveyor has been engineered to gently handle shrink wrap packs or corrugated 4-packs, 6-packs, 8-packs and 12-packs.

The conveyor has been designed with 0.3" pitched chain wrapped around a 1/4" nosebar to minimize deadplates from chain-to-chain transfers. This helps eliminate product skewing caused by product drag on deadplates. The conveyor is designed to be driven off an existing chain with no need for a motor and is also available as a standalone conveyor.

Contact our experienced sales teams today for a comprehensive review of your application(s) and to see how our Tight Pitch Live Transfer Conveyor can benefit your company.
